# SAFETY MOMENT

## Fire It Up Safely: Grilling Safety

Summer has officially kicked off and millions of Americans have started grilling. The U.S. Consumer Product Safety Commission (CPSC) urges consumers to check their grills and “fire it up safely” to prevent fires and carbon monoxide poisoning.

### Before lighting the grill, do a safety check:

**Has your grill been recalled?** Check [SaferProducts.gov](https://www.saferproducts.gov). If the grill has been recalled, contact the manufacturer and stop using it until you get a repair or replacement.

**Visually inspect the hoses** on a gas grill for cracking, brittleness, holes and leaks. Make sure there are no sharp bends in the hose or tubing and that all connections are secure. Replace if necessary.

**Check for propane gas leaks.** Open the gas supply valve fully and apply a soapy solution with a brush at the connection point. If bubbles appear, there is a leak. Try tightening the tank connection. If that does not stop the leak, close the gas valve and have the grill repaired by a qualified professional.

**Is the grill clean?** Regularly cleaning the grill, as described in the owner’s manual, and also cleaning the grease trap, will reduce the risk of flare-ups and grease fires.

Once the safety check is complete, make sure to operate the grill as safely as possible using these three steps:

1. Use grills outside only
2. Never leave your grill unattended
3. Keep children away from the grilling area
